Station Data

Station Name	Company Name	Station Location	Telephone
			FAX: خلوي

Station Address	Station Type	Broadcasting Programs	Station Specify (Link - Main - Repeater)

Station Coordinates Local Grid - DMS -UTM –2FR36 12 Numbers	East- Longitude (x)	North- Latitude (y)	Ground Height (ASL) (m)

Transmitter		Antenna				
Max Output Power (kW)	Model - Type & Manufacture Name	Model - Type & Manufacture Name	Gain (dBd)	Polarization	Tower & Building Height (m) AGL	Effective Radiated Power –ERP (kW)

Requested Frequency MHz	If The Station Operative, Specify. Or Operation Planned Date	Bandwidth (MHz)	Harmonics (dBc)	Service Area Field Strength (dBuv/ m)

Enclosed: - coverage map of Radio /TV Station.

The technical parameters of transmitter and the antenna, including the Antenna directivity diagram in the horizontal and the vertical planes, the Frequency range (with and without alignment), transmitter frequency Stability, equipment compliance to applicative standards. (i, e : FCC , EBU , ETSI ,CCIR , IEEE etc.) .

We hereby declare that all the data in this application is correct.

Signature:

FM Transmitter

- MAX FREQUENCY DEVIATION (+/-) 75 kHz .
- USE AUTOMATIC DEVIATION LIMITER.
- USE OF OUTPUT BAND PASS FILTER mandatory
- BANDWIDTH 150 kHz MAX.
- nominal output power
- actual radiated power
- effective radiated power
